Read the following passage carefully and answer the questions from 1 to 6 :

One day John went to a fair and bought nine donkeys. He rode home on one and the rest followed behind. After a while he thought to himself that he should make sure that all his donkeys were following him, so he turned round to count them and found one missing. "Where is number nine ?" he cried. He jumped off his donkey and looked behind the rocks and trees but no donkey was to be seen. "I'll count them again," said John so he did and counted nine. "Oh ! He must have strayed and will come back," said John.

After a while he counted his donkeys again and again he counted only eight. Seeing his friend Musa walking down the road John requested him to help him count his donkeys. He said to Musa "When I get off my donkey and count them, there are nine but as soon as I mount the donkey I'm riding on, one of them disappears". Musa laughed and said "I can see ten donkeys". "How can that be possible I bought only nine donkeys." Musa laughed again "You are sitting on one and eight are following you". John replied "How silly of me ! But that makes it nine. So where is the tenth you can so clearly see ?" "He is sitting on top of the ninth donkey" said Musa. "And his name is Abu John."
